

Dynamic Prototype Operations

Precision machining, stamping, laser cutting, injection molding, rapid prototyping

Complete Prototype Solutions for New Product Development

Dynamic Prototype Operations is staffed and equipped to meet even the most demanding prototype needs in the automotive, medical equipment, and other manufacturing industries. We provide complete product design solutions, from concept to prototype to inspection of the finished product.

Working from either a 3-D CAD model or a blueprint, and utilizing any of our multiple in-house machining centers, we can produce a dimensionally precise prototype of virtually any part—and in any quantity, whether you need just a single part or more.

Precision machined and plastic injection molded parts

With our engineering and design capabilities, fully equipped facility, and a highly experienced team of professionals, we can produce prototypes out of almost any material. We can machine even the most complex three dimensional parts, perform sheet metal stamping, overmold stampings, and produce the initial tooling required for your product's production—all under one roof and in less time than you're probably accustomed to.

Our ability to satisfy all of our customers' prototyping needs with short lead times and the highest accuracy has earned Dynamic Prototype Operations a reputation as one of the industry's most dependable suppliers. Find out how we can put that reputation to work solving your next prototype challenge. Call us at 248-338-1100.

Dynamic is fully equipped to handle any prototyping need

- Injection Molding
- Laser Cutting
- CNC Ram EDM
- CNC Machining
- CNC Turning
- Computer Aided Design/Manufacturing

Committed to Quality and Service

Our ISO 9001:2008 Certification is a symbol of our commitment to quality and to continuous improvement of our services to assure long lasting, mutually satisfactory relationships with our customers. We promise to deliver the highest accuracy—on schedule and cost competitively—every single time.

CNC machining

Metal forming

Injection molding

CNC Turning

Dynamic Prototype Operations

Your One Stop Shop for Any Prototyping Need

- Prototyping
- Injection Molding
- Precision Machining
- Specialized Stamping
- Rapid Prototyping
- Design & Engineering
- CMM Inspection
